NAHJLY

Comparison

Up to four schools from the same dated extract. A marker names the highest or lowest figure in this set.

Capture date 1 January 2025 · 1 schools

1	4	1 January 2025	0
Schools in this set	Limit	Capture date	Markers

Recorded tuition

A lower figure is a lower fee in this set, not a recommendation.

The Philippine School — AED 7,058

Students

The Philippine School — 562

The same fields, side by side

Field	The Philippine School
Judgement	Acceptable

Curriculum	Private Philippine
District	Bani Yas
Gender	Mixed
Tuition	AED 7,058
Students	562
Students per teacher	12.8
Students of determination	2.3%
Capacity utilisation	60.2%
National share	0%

Position inside this set

- The Philippine School: No extreme figure in this set

Method and sources

Source: Abu Dhabi open data, ADSDI layer 212. The capture date is the snapshot date on the rows in this view. Good or better counts schools whose judgement is Good, Very Good, or Outstanding. Schools with no judgement sit outside that percentage. Students per teaching-staff member, the share of students of determination, capacity utilisation, and national-student share are derived by Nahjly. National students are the boys national field plus the girls national field. The extract does not call that sum Emirati, and the truncated female teaching-staff national field is not used. Size bands are Nahjly groupings, not an ADEK classification. ADEK's October 2025 totals are a separate published statement and are not added into these charts. This file does not name a best school, a top school, or a winner.
